

Fume Cupboard Assessment Sheet

Use this sheet to record the heights of the fume cupboards during the after hours survey. Record the opening of the fume cupboard as found during the audit and the total possible opening of the fume cupboard.

Ideally sample all fume cupboards (especially if 10 or fewer). If more than 10 take a representative random sample of the fume cupboards. Use a second sheet if necessary.

Add up all the opening values and then divide by the number of fume cupboards sampled to determine the average actual opening and average total opening.

Fume Cupboard	Total possible opening	Actual opening
Fume Cupboard 1		
Fume Cupboard 2		
Fume Cupboard 3		
Fume Cupboard 4		
Fume Cupboard 5		
Fume Cupboard 6		
Fume Cupboard 7		
Fume Cupboard 8		
Fume Cupboard 9		
Fume Cupboard 10		
Fume Cupboard 11		
Fume Cupboard 12		
Fume Cupboard 13		
Fume Cupboard 14		
Total		
Average (Total divided by the number of FC surveyed)
